The proposed amendments to TPD B and G shall expand the existing definitions for Ratcheted Supply Point Capacity (Ratcheted SOQ), Maximum Supply Point Capacity (Max SOQ), Maximum Supply Point Offtake Rate (Max SHQ) and Provisional Maximum SOQ (PMSOQ) to include where a DM Supply Point has a Network Exit Agreement (NExA) in place. The amendments shall also ensure appropriate restrictions are in place so that a site's SOQ or SHQ cannot increase above the maximum value stated in the NExA.
