

## **Transco General Notice**

**"Requirement for Users to ensure non-domestic Supply Meter Installations are installed and  
maintained by accredited Meter Asset Managers"**

Version 1.0

Dear Colleague,

Transco has raised Network Code **Modification Proposal 0701 "Requirement for Users to ensure non-domestic Supply Meter Installations are installed and maintained by accredited Meter Asset Managers"**. This was submitted to Ofgem on 8 June 2004 requesting that Urgent Procedures apply. Ofgem has now granted urgency and due process including industry consultation will now apply.

Ordinarily, Transco would have preferred that its Proposal be presented and discussed within the June 2004 Supply Point & Billing Workstream. Unfortunately time constraints associated with ensuring that Transco's Proposal is directed upon by Ofgem in advance of the RGMA go/no-go decision on 25 June 2004 has dictated the need for Urgency.

Should you have any queries or require any clarification regarding Modification Proposal 0701, the contacts within NGT are:

Content and rationale:	Peter Close/Bob Fletcher -	Tel - 01926 655348/01926 655390.
Process:	Chris Warner -	Tel - 0121-713-5003.
