

Charging Volatility

NTS CMF – 02 May 2013
Colin Williams, National Grid NTS

Overview

- 1st May – Issued October 2013 Annual NTS Exit (Flat) Capacity charges and three subsequent years indicative charges
- Implementing the recent one-off April 2013 change to NTS Exit (Flat) Capacity charges aimed to reduce the volatility of charges in the short to medium term
- Now that October 2013 charges are known the following chart is showing how this view of volatility has changed given the new charges issued on 1st May

NTS Exit (Flat) Capacity charge volatility
