

## UNC Data Dictionary

**Mod 461 WG 7<sup>th</sup> November 2013**

Hayley Burden

# UNC Data Dictionary

---

- NG NTS has reviewed the publication times contained within the Data Dictionary and assessed whether they are impacted by the change to the Gas Day using the following criteria;

	No change to publication or description
	Change to description but not to publication
	Industry publication, to check with them
	Change to publication time

- The Interruption and most of Transitional data are out of scope due to Exit Reform
- Most of the publications in scope are unaffected by the change to the Gas Day, as most are released after the Day

## Key Impacted Areas

---

Topic Area	Category	Number of Changes
Balancing		3
Linepack		3
Linepack		1
Capacity Entry		2
Demand		2
LNG		2
Storage		1

- Where change is required, these are mainly to the publication descriptions, to reflect the Gas Day will become 5 to 5
- Changes only required to Balancing and Linepack publication times

## Next Steps

---

- Are the Mod 461 WG in agreement with our proposals for the Data Dictionary?
- Changes identified within the Mod 461 WG would not be included in the Modification itself
- NG NTS to formally approach the UNC Committee to make the necessary changes to this document as part of the implementation plan
