#### Do you support or oppose implementation?

Support

#### Please summarise (in one paragraph) the key reason(s) for your support/opposition.

Implementation of this modification would provide transporters with information on those sites that would suffer severe damage if shut down. This would allow them to take preventative measures where possible to avoid this happening. Whilst this modification does not place any obligation on transporters, the fact that this information would be available is a positive move.

#### Modification Panel Members have indicated that it would be particularly helpful if the following questions could be addressed in responses:

*Q1: Do you consider that this change will have a material impact on either your business or competition in shipping, transportation or supply of gas, and if so, what?*

No.

#### Are there any new or additional issues that you believe should be recorded in the Modification Report?

No.

#### Relevant Objectives:

*How would implementation of this modification impact the relevant objectives?*

We agree with the proposer that this modification will positively impact relevant objective a) because transporters would have information that would allow them to better plan gas emergencies.

#### Impacts and Costs:

*What analysis, development and ongoing costs would you face if this modification were implemented?*
