Do you support or oppose implementation?

0478 - Support

Please summarise (in one paragraph) the key reason(s) for your support/opposition.

Our support links back to the approval of 0405. We support Ofgem's comments in its decision to implement UNC Modification 0405, in which they state that by recognising a customer's real needs, the market as a whole would operate in a more effective and competitive way. This Mod supports these principles.

Are there any new or additional issues that you believe should be recorded in the Modification Report?

Relevant Objectives:

How would implementation of each modification impact the relevant objectives?

Impacts and Costs:

What analysis, development and ongoing costs would you face if either modification were implemented?

Implementation:

What lead-time would you wish to see prior to either modification being implemented, and why?

Legal Text:

Are you satisfied that the legal text will deliver the intent of each modification?

Is there anything further you wish to be taken into account?
