#### Do you support or oppose implementation?

Support

#### Please summarise (in one paragraph) the key reason(s) for your support/opposition.

Modification of the UNC in order to allow the iGTs to make use of Xoserve to administer their relationships with both Users and other Transporters would be expected to result in significant benefit to all industry parties from both a cost and efficiency point of view.

#### Are there any new or additional issues that you believe should be recorded in the Modification Report?

We are uncertain as to the degree to which this proposal is contingent on UNC 0467 (“Project Nexus – iGT Single Service Provision – Data Preparation”). UNC 0467 has not yet been issued for consultation as the requirements on Shippers in relation to data are still under development. It is not clear whether or not this modification can be successfully implemented without the successful implementation of UNC 0467.

#### Relevant Objectives:

*How would implementation of this modification impact the relevant objectives?*

Implementation would be expected to facilitate relevant objectives d) i) and ii) effective competition between shippers and suppliers and f) promotion of efficiency in the implementation and administration of the code.

#### Impacts and Costs:

*What analysis, development and ongoing costs would you face if this modification were implemented?*

Although implementation and process change costs are likely to be reasonably significant, we believe that the resulting benefits will outweigh these.

#### Implementation:

*What lead-time would you wish to see prior to this modification being implemented, and why?*
