DSR Framework and Methodology Consultation

Date: 23 January 2015

Organisation: HSE - Mike Potter

Abstract:

“As discussed with one of your representatives this morning I am replying to confirm a ‘Nil return’ HSE response following review of the Consultation documentation and available industry responses as at 23 January.

We don’t normally confirm ‘Nil Returns’ now but due to HSE involvement throughout the Gas SCR processes I thought it important to submit this in this instance to confirm general agreement with the NGG approach to implementing these measures, and industry response, as part of preventing/managing the early stage of a Network Gas Supply Emergency following the issue of a gas deficit warning.

Regards – Mike
