

Action EU0301 Moffat IP Clarification

Fergus Healy

Clarifications

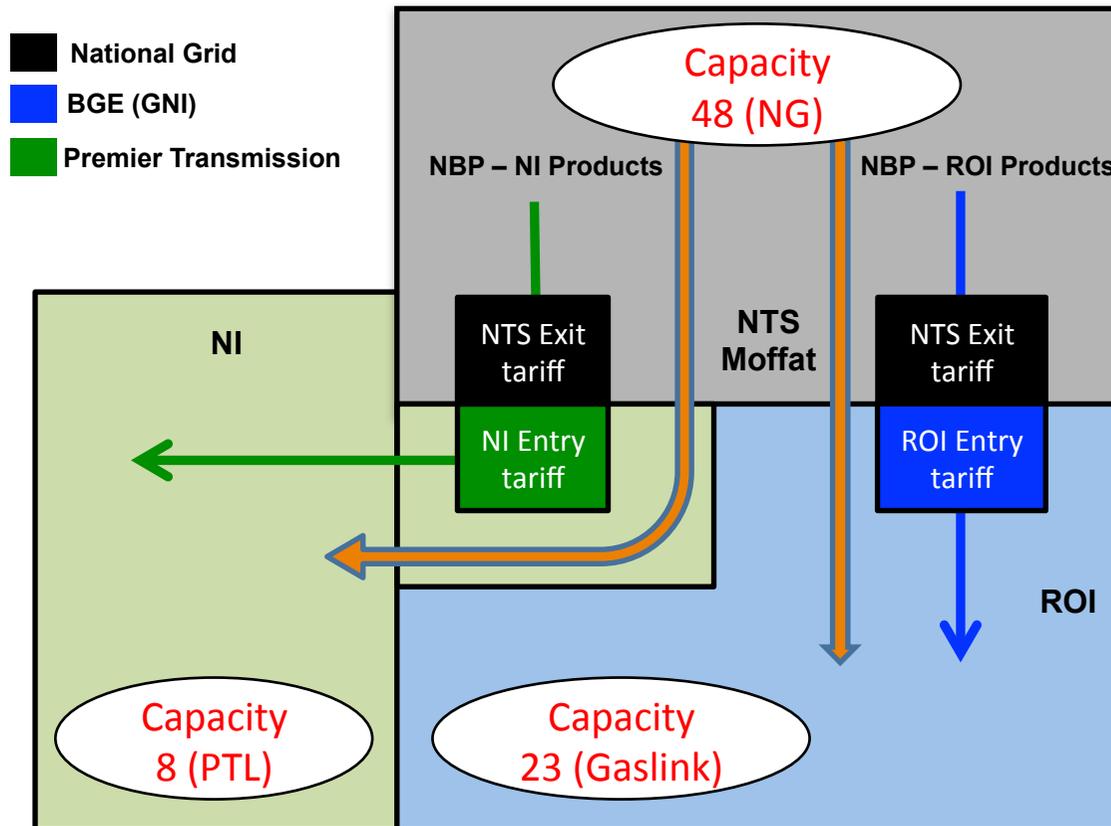

- a) How will the Moffat Exit Capacity Baseline be treated?
 - **The NTS Baseline figure is unaffected and will remain at 47.95mcm/d**
- b) Are two separate Bundling products required?
 - **On the GB side Moffat is a single IP, NTS will notify PRISMA of its 'Available Capacity' and Shippers will bid for capacity in a competing auction**
 - ROI & NI products offered separately on PRISMA
 - GB Shippers register to bid for either ROI or NI products with PRISMA
 - Shipper registration validated by NG, GNI (Gaslink) or PTL as required
- c) Whether there might be less capacity available on the Irish side of the IP than on the GB side?
 - **Depends - subject to pre CAM Capacity sales**

GB – Ireland

Shipper Products

NBP-NI + NBP-ROI

- Moffat remains as a single exit point on NTS
- ROI & NI Products offered separately by Gaslink & PTL respectively on PRISMA
- ROI & NI Shippers register to bid for each product separately with PRISMA
- GB shipper registers to bid for either NI or ROI products with PRISMA
- Gaslink validate ROI Shipper registration for ROI products with PRISMA
- PTL validate NI Shipper registration for NI products with PRISMA
- NG validate GB shipper registration for GB products with PRISMA

*Capacity figures rounded in MCM

Moffat - Available Capacities

No % of Technical Capacity Withheld

TSO	Available Capacities (Volume - mcm/d) No % Technical Capacity withheld				
	2015/2016	2016/2017	2017/2018	2018/2019	2019/2020
National Grid	24.49	24.58	25.03	25.03	25.03
PTL	3.91	3.91	3.91	3.91	3.91
Gaslink	21.62	21.62	21.56	21.56	21.56
NG capacity compared to PTL/Gaslink	-1.04	-0.95	-0.44	-0.44	-0.44

National Grid information based on NG Website data at 27 Nov 2015 (includes July 2014 reduction requests)
Assumed CV 39.8

Moffat Competing Auction

- May occur when one side of a IP has less capacity made available in an auction than the other side; and
 - demand is provided via Shipper bids for that capacity at this level
 - therefore Shippers will need to bid for demand **greater than the available GB capacity** level at Moffat for competition to occur.

Capacity Measures Moffat IP

- National Grid – Moffat Exit to Irish Market:
 - Incentivised to offer additional non-obligated capacity when obligated capacity sold out (price v risk)
 - Release of daily Interruptible capacity based on unused Firm capacity (offered DA as unbundled)
 - CMP measures implemented:
 - LT UIOLI (bundled and unbundled)
 - Potential removal of Capacity if unutilised (subject to criteria)
 - e.g. point becomes constrained etc. and subject to NRA(s) approval
 - Surrender of Capacity (bundled and unbundled)

Shipper Perspective - Capacity

Shipper	Buying Capacity
<p>NTS Shipper</p>	<p>Can buy GB to NI capacity product bundle and GB to ROI capacity product bundle via auction on PRISMA. (Must also be registered as PTL Shipper or Gaslink Shipper respectively)</p> <p>Can buy unbundled NTS Moffat Exit and Virtual Entry capacity via auction on PRISMA if available.</p> <p>Can buy secondary capacity products on PRISMA</p>
<p>PTL Shipper</p>	<p>Can buy GB to NI capacity product bundle via auction on PRISMA. (Must also be registered as NTS Shipper)</p> <p>Can buy unbundled NI Entry and Virtual Exit capacity via auction on PRISMA if available.</p> <p>Can buy secondary capacity products on PRISMA.</p>
<p>GNI Shipper</p>	<p>Can buy GB to ROI bundle via auction on PRISMA. (Must also be registered as NTS Shipper)</p> <p>Can buy unbundled ROI Entry / Virtual Exit capacity via auction on PRISMA if available.</p> <p>Can buy secondary capacity products on PRISMA.</p>
