Dear Julian

UNC Modification Proposal 0060: 'Publication of Information in the Maintenance Programme'

Thank you for your invitation seeking representations with respect to the above Modification Proposal.

National Grid Gas plc (UK Distribution) ("Distribution") is supportive of this modification in principle as the exchange of information between National Grid NTS and the appropriate NTS shippers and consumers for all NTS connected sites should help to minimise disruption of gas supplies. Distribution believes that this is best achieved by the specific information being provided to the appropriate Relevant Parties rather than to all shippers and consumers affected by the planned NTS Maintenance Programme.

On this basis the proposal would better facilitate the relevant objectives by increasing the efficient and economic operation of the pipeline system through the improved coordination of the planned activities of NTS consumers and National Grid NTS.

Yours sincerely,

Declan McLaughlin
