Dear Julian

Re: UNC Modification Proposal 0080

Corona Energy (“Corona”) wishes to submit the following in response to the above modification proposal draft report.

Corona supports the implementation of this proposal as we believe it would better facilitate the achievement of the Relevant Objectives, specified in Standard Special Condition A11.1 of the GT Licence, in particular;

- a) *“the efficient and economic operation of the pipe-line system”*; and
- d) *“the securing effective of competition between relevant (i) shippers and (ii) shippers”*

Corona believes that the Proposal is pragmatic as it aligns AMRs with Daily Read Equipment. This will ensure more automated reads are captured, which in turn will reduce industry costs and maximise efficiencies in a number of key processes.

In common with the draft modification report we can see no disadvantages related to the implementation of this proposal and fully endorse the sentiments captured therein.

We trust you find our comments useful and if you have any questions then do not hesitate to get in touch.

Yours sincerely

Mark Pearce
