"Provision of a Supply Point Enquiry Service for Smaller Supply Points" Version 1.0

Date of Communication: 18/07/2006
External Contact: Martin Brandt(Scottish And Southern Energy plc)
Slant: Against
Strictly Confidential: No

Abstract

Scottish and Southern Energy do not agree with this modification proposal. This is because it contradicts Mod 087 which is proposing to remove similar obligations in the same area from the UNC because they will come under SPAA. We therefore consider it inappropriate to add further obligations to the UNC whilst others are being removed.

It might be that this request could be considered by SPAA,, but before that is done it would be sensible to ensure there are no data protection issues and also consider whether this is information that could be made available via the website instead.

Regards

Martin Brandt
