Dear Julian

### **Modification Proposals 0099**

Thank you for providing Scottish and Southern Energy plc (SSE) with the opportunity to comment on the above modification proposal.

SSE is supportive of the proposal.

SSE supports the proposal because it should result in more accurate data collection.. Implementation of the mod should promote accuracy and therefore efficiency in implementation and administration of the UNC.

The use of the proposed form would provide greater transparency and good accountability of AQ values relating to erroneous charges. It would also provide efficient management of the system through the provision of better quality data. The revised form would help to determine the likely gas consumption on a residential property and should only be used for:

- A Change of Supplier process.
- Domestic properties with AQ above industry recognised threshold of 293,000 KWh i.e. monthly meter read cycle

Yours sincerely

Jeff Chandler  
Energy Strategy
