Draft

## **DEVELOPMENT WORKGROUP - TERMS OF REFERENCE**

**PROPOSAL REF: 0105 - Establishment of Calorific Value (CV) zones to facilitate the implementation of a flow weighted average (FWA) methodology**

### **Composition**

Chris Train	TransCo
Graham Ryott	TransCo
Nigel Sisman	TransCo
Brian Purvis	TransCo
Adrian Fernando	Amerada Hess
Richard Sarsfield-Hall	BGT
Mike Young	Alliance
Kevin Bennett	ENG
Dave Jenner	National Power
Tony Acton	Mobil
Courtney Sayer	Ofgas
Tahir Majid	Ofgas

### **Scope of Development Group**

To facilitate the implementation of flow weighted average CV charging under the Network Code, the workgroup would need to review the implications of establishing 3 extra Exit Zones from a sub-division of existing Exit Zones. This will allow for compliance with the Gas (Calculation of Thermal Energy) Regulations, would reduce unbilled energy on the transportation system and be compatible with current Shipper/Supplier computer systems.

The Group will need to develop an implementation timetable including the definition of a systems solution.

### **Area of Code**

Principal Document Section C 1.7

### **Timetable**

The Development Group will produce recommendations for the February meeting of the Modification Panel.
