Dear Julian,

UNC Modification Proposal 0110: ‘Amendment of Px’s Network Entry Agreement’

Thank you for your invitation seeking representations with respect to the above Modification Proposal.

National Grid Gas plc (UK Distribution), (“Distribution”), would like to offer support for the proposal to amend the measurement ranges of the fiscal meters set out in the Network Entry Provisions contained within Px’s Network Entry Agreement (NEA).

Implementation of the request would ensure that the capacity of the terminal, and its ability to deliver gas into the UK gas network, is not limited by the ability of the input meters to measure the flow. As such, increasing the capacity of these input meters in the Network Entry Provisions would be another incremental improvement to help maximise the volume of gas delivered by shippers included in the Px arrangement and, accordingly, would increase supply availability to the UK gas market.

Hence, Distribution supports the amendment.

Yours sincerely,

Phil Lawton.
