

Distribution charging and mods 115 +115a

Tim

I would like to record the MEUC view on the above.

We fully support the proposal to change the capacity/commodity split to 95/5 on distribution networks.

On the proposed modifications 115 & 115a we do not feel there is need for change from the existing arrangements in this area. If however a change is to be implemented we would support mod 115a but not mod 115.

Regards, Eddie
