

UNC Modification 0123 Representation from Northern Gas Networks

Northern Gas Networks support the implementation of this proposal. It is our understanding that Distribution Networks (through DNCC) will be able to fully implement the proposal on the required implementation date, and in doing so will satisfy the relevant objectives outlined within the proposal. We similarly believe this proposal provides the required information sought by National Grid Transmission in pursuant of its own objectives previously set out in Modification proposal 0100.

Many thanks for your consideration of this representation from Northern Gas Networks.

Regards

Robert Cameron-Higgs
Network Code Manager
