Re: UNC Modification Proposals 123 “Provision of Demand Information to Meet the 14:00 Total System Demand Forecast”

Dear Julian

Thank you for the opportunity to comment on the above UNC Modification Proposal.

Wales & West Utilities supports the implementation of this Modification Proposal (123) as we believe that implementation will provide an economic and pragmatic solution to the provision of accurate and timely demand information for inclusion in the NTS 14:00 Total System Demand Forecast.

The Modification Proposal (0123) was granted Urgency on the basis being linked to a specific date related event, (being the revised implementation date for UNC100), and a real likelihood of significant commercial impact upon GTs, shippers or consumers if the proposal is not granted urgency.

This proposal builds on the requirements laid out in Modification Proposal 100 and has developed an economic and pragmatic approach to allow all Users to provide sufficient and robust information to allow National Grid NTS to fulfil its forecasting obligations.

We believe that implementation of this Modification Proposal will better facilitate the achievement of the Relevant Objectives to facilitate the efficient and economic operation of both the NTS and each DNOs' system(s).

Yours sincerely

Liz Spierling
