1 May 2007

Dear Julian

Extension of the Current Sunset Clauses for Registration of Capacity at NTS Exit Points
; proposal 0142

Northern Gas Networks support the introduction of this Modification proposal to the UNC.

An early implementation would provide the certainty required for a process to allow confirmed capacity allocations to DNO users. In this respect the proposal facilitates the relevant objectives set out in Standard Special Condition A11 1(a), (b) and (c) of the Gas Transporters Licence.

Yours sincerely

Robert Cameron-Higgs
Network Code Manager
