5th October 2007

Dear Julian

Modification Proposal 0173 Obligations to process data received from IGTs inline with requirements of Annex A of the CSEP NExA

Thank you for the opportunity to comment on this proposal. EDF Energy is in support of the implementation of this modification.

This modification has been produced to rectify a number of omissions from the legal text produced for Modification 0083. Specifically the requirement for processing iGT data in a timely manner was missing from the legal text. The formalisation of processes between large and small transporters is a key method by which shippers can have improved certainty over the validation that is applied to data provided by iGTs.

The alignment of the legal text with the intention of Mod 0083 and Xoserve's activities since the implementation of the modification will promote efficiency in the administration of the UNC. The alignment of activities will also serve to provide certainty between relevant shippers.

Yours sincerely,

A handwritten signature in black ink that reads 'Rosie McGlynn'.
