Re: Proposed UNC Modification 0174: Revised Tender Timescale for DN Interruption Arrangements

Dear Julian,

RWE Npower supports the implementation of the proposed UNC Modification. The proposed moving back of the notification of tender results as relating to DN Interruption does not reduce the period of time available to Shippers to consult with their clients who wish to tender and neither does it reduce the period of time available to Shippers to carry out the necessary system development to participate in these tenders. In addition, giving the Distribution Network Operators more time to analyse and consider the tenders received will enable them to allocate interruptibility on as efficient and economic a basis as possible.

If you wish to discuss any points raised in this response further, please do not hesitate to contact me.

Regards,

Chris Hill
