

Supplemental Workstream Report
Small value invoice payment deferral
Modification Reference Number 0201

Version 1.0

This supplemental Workstream Report is presented for the UNC Modification Panel's consideration.

At the May Panel meeting, Panel Members agreed unanimously to defer consideration of the Final Modification Report and to seek further views from the Distribution Workstream as two new issues had been raised in representations. The new issues were whether the relevant Transporter could require deferral if the User had not consented and whether the Capacity Neutrality Invoice was included or not.

The May Distribution Workstream discussed this and considered that it should be discussed further at the Billing Operations Forum on 17 June with a report back to the June Workstream.

At the June Workstream meeting it was confirmed that this had been discussed at the Billing Operations Forum and there was no issue with the Proposal from the attendees at that meeting. Therefore BGT did not propose to make any amendments to the Proposal, believing it was clear in its intent and that the Panel could now proceed with a recommendation.
