Re: Modification Proposal 0212: 'Revision of the Rough Storage Connection Agreement'

Dear Julian,

Thank you for your invitation seeking representations with respect to the above Modification Proposal which would facilitate an increase in the injection exit rates through the interruptible meter at Rough Storage facility. A Uniform Network Code Modification Proposal is required to allow the change to the Storage Connection Agreement. Modification Proposal 0165V dealt solely with measurement ranges and did not address the issue of injection rates.

National Grid Gas Distribution plc (NGD) would like to offer support for this proposal, and agrees with the proposer's view that implementation would be consistent with the better facilitation of the relevant objectives detailed in the Gas Transporter Licence, specifically, A11.1(a); the efficient and economic operation of the pipeline system; and A11.1(d); the securing of effective competition ...

If you have any queries in relation to this representation please contact Alison Chamberlain 01926 653994.

Yours sincerely

Richard Court
