Dear Julian,

The following is the Scottish Power response to

**UNC Modification Proposal 0236 –
“Amendment to PX (TGPP) Limited Network Entry Agreement”**

Thank you for allowing us to respond to this modification.

We support Modification 0236.

The modification in our view will further the relevant objectives as set out in Standard Special Condition A11 (1) of the Gas Transporters Licence, by maintaining the efficient and economic operation of the pipe-line system.

We believe that implementing this mod could encourage additional gas supplies onto the system and lead to the development of further potential reserves

We believe that the consequences of changing specification gas coming into the UK should be closely monitored, given the potential safety implications. However, no potential negative impacts as a result of these changes have been identified, and implementation should enhance security of supply.

Should you have any queries on the views expressed, please contact me on the telephone number as shown.

Yours Sincerely,

Commercial & Regulation Manager (Gas)
