UNC Modification Proposal 0243
-Initialisation of Enduring NTS
Exit Capacity at Moffat

Dear John,

Thank you for the opportunity to respond to the consultation on Modification Proposal 0243 – “Amendments to the process for initialisation of Enduring NTS Exit (Flat) Capacity at the Moffat NTS Exit Point”. ExxonMobil supports this modification because we believe that it is important for cross-border points to operate effectively and if it is perceived that there is a mismatch in the capacity purchase arrangements in the adjoining Transmission Networks which may hamper market operation then it is important that these issues are resolved.

I hope these comments are helpful and if you have any questions regarding this response please don't hesitate to contact me.

Yours sincerely

Joy Chadwick
