Code Modification Proposal No 0244 –Amending DM Supply Point Data for Sites with Significant Changes in Usage

Response from Chemical Industries Association

Dear Tim,

The CIA welcomes the opportunity to respond to this modification proposal and is for the implementation of modification 0244.

With the current economic situation, a number of chemical sites are either mothballed or running at significant reductions on possible production capacity. The opportunity for large consumers to avoid charges for capacity they no longer need are welcomed especially during the current difficult circumstances.

We fully support this modification and urge that it is implemented as soon as possible.

Yours,

Gareth Davies
