

Transco General Notice
"Introduction of Change of Tenancy Marker to the Confirmation/Registration process"
Version 1.0

08/04/2003

Dear Colleague,

IMPORTANT NOTICE FOR YOUR ATTENTION

DEFERRAL OF IMPLEMENTATION - MODIFICATION PROPOSAL No: 0591

"Introduction of Change of Tenancy Marker to the Confirmation/Registration process"

Please note that the Final Modification Report, Version 2.0, was signed by Ofgem on 04/04/2003.

A prerequisite for the implementation of this modification is the development of systems changes identified within UK-Link Change Request 9632.7. You may be aware that this change is 'bundled' within the Review of Gas Metering (RGMA) changes under the 'change of supplier' banner. Transco understands that this was at the request of, and in agreement with, the RGMA implementation forum "IMSIF" and was based on a shipper requirement that no relevant systems changes should be undertaken ahead of Transco metering separation ('cutover') currently planned for November 2003.

You will be aware that the 'cutover' date has moved on a number of occasions and consequently implementation of Modification Proposal 0591 will be dependant on when this date is finalised.

Transco is currently discussing the matter with Ofgem and will write to you again in the near future.

A revised Notice of Implementation will be issued once a new date has been firmly established.

Yours sincerely,

Julian Majdanski

Modification Panel Secretary.
