

Sir John Mogg
Chairman
Gas and Electricity Markets Authority
9 Millbank
London
SW1P 3GE

23 September 2004

Dear Sir John

Further to the Modification Panel meeting of 16 September, I am writing to you on the instructions of the Panel Members, pursuant to Rule 8.10.2 (a) of the Network Code Modification Rules.

Due to the length of time that the Final Modification Reports have been with the Authority, and the importance of the industry being informed of the outcome prior to the coming winter season, the Panel request the Authority to give an indication of the likely date by which a decision shall be made regarding the following Modification Proposals;

Proposal 0639 "Isle of Grain: Change of Status from LNG Storage Facility to Importation Terminal"

Proposal 0671 "Enhancements to Winter Injection Process"

I look forward to your response and have placed the proposals on the Agenda for further consideration at the Modification Panel meeting to be held on 21 October.

Yours sincerely

Julian Majdanski

Secretary to the Network
Code Modification Panel
