

0608: Implementation of 'single service provision' arrangements for iGT connected system exit points (Project Nexus transitional modification)

National Grid Gas Distribution

Why change?

- Modification 0440 introduced the UNC iGT Arrangements Document (iGTAD) as a replacement to the UNC ancillary document, CSEP Network Exit Agreement (NExA)
- Following Project Nexus Implementation Date the new iGTAD will replace the generic NExA
- To ensure an orderly transition from the CSEP NExA to the iGTAD, transitional terms are required

- It is proposed that UNC transitional terms are included to:
 - Introduce IGTAD/Transportation Principal Document (TPD) transitional terms associated with:
 - iGT Data migration and use of such data by DNs
 - Provision by iGTs of data to CSEP Users
 - Provision by the DNO of data to the iGT
 - Clarify iGTAD Committee arrangements
 - Outline the requirement for each Transporter and iGT to enter into the amended Transporter Framework Agreement and for iGT accession to the Data Services Contract (DSC)
 - Incorporate terms to enable termination of the CSEP NExA

Recommended Steps

- The Proposer recommends that this modification should be
 - Subject to self-governance
 - Proceed to Workgroup assessment to develop the modification for a period of two months
