MOD REVIEW GROUP 131

22 August 2007

Stefan Leedham

• OVERVIEW

- Expert Determination
- Issues to be resolved
- Governance

❖ EXPERT DETERMINATION

1. Automatic Expert Determination for all MERs greater than 50GWh
 - Potential to create duplication of work
 - Cost
 - Removes potential for manipulation
2. Independent Calculation of MER by Expert
 - Potential to reduce costs for Transporters
 - Removes potential for manipulation
 - Provides assurance of independent, unbiased MER
 - Provides Transparency to industry

❖ ISSUES TO BE RESOLVED

1. Selection of Experts

- Experts to be selected by Offtake Committee taking consideration of any User suggestions
- List to be reviewed annually to ensure that it remains applicable
- Expert for MER to be appointed by Offtake Committee taking consideration of any User suggestions

2. Terms of Reference

- Expert to be employed to develop a MER using the most appropriate methodologies to ensure that as accurate as possible MER is produced
- Expert to report directly to Offtake Committee and any sub-committee formed
- Expert to provide monthly reports to Offtake Committee and any sub-committee formed on proposed methodologies, issues identified and potential solutions
- Expert to listen to and respond to any issues raised by the appropriate group
- Expert to ensure that the procedures laid down in Notification Process are followed

❖ GOVERNANCE

1. Ancillary Document to OAD

- Under Governance of Offtake Committee
- Users would require ability to raise changes to ancillary document and vote on these changes
- Creates complexity
- Introduces Users into the OAD

2. Ancillary Document to TPD

- Referenced in TPD Section J (7.3?)
- Under Governance of UNC Committee
- Users currently have rights to raise changes and vote on these changes
- Maintains the OAD as a Transporter to Transporter Document

THANK YOU
