Support or oppose implementation?	Comments
Relevant Objective:	d) Positive

Reason for support/opposition: Please summarise (in one paragraph) the key reason(s)

SGN supports the resolution of unidentified gas as an industry priority. We do however note that XRN4695 is currently progressing through Xoserve DSC Change Management procedures as a restricted Shipper class proposal and as such we do not consider that a UNC modification is required as this will achieve the same goal when delivered.

Implementation: *What lead-time do you wish to see prior to implementation and why?*

If this modification is approved then the implementation should be as soon as possible.

Impacts and Costs: *What analysis, development and ongoing costs would you face?*

None identified.

Legal Text: *Are you satisfied that the legal text will deliver the intent of the Solution?*

N/A.

Are there any errors or omissions in this Modification that you think should be taken into account? *Include details of any impacts/costs to your organisation that are directly related to this.*

None identified.

Please provide below any additional analysis or information to support your representation

We have no further analysis.
