

UNC 0660

Amendment to PARR permissions to allow PAC to update with UNCC approval

Proposer: Graham Wood, Centrica (on behalf of the PAC)

Panel Date: 21 June 2018

Why change?

- A number of reports are included within the Performance Assurance Report Register (PARR)
- Any changes to the PARR e.g. the inclusion of a new report or amendment to an existing report, requires the progression of a UNC modification proposal
- This process has been identified by the PAC as an inefficient way to manage the PARR suite of reports

Options

- The proposal seeks to remove the requirement to progress a UNC modification each and every time a change to the PARR is required
- Instead, it is proposed that simplified arrangements are introduced, requiring PARR related changes to be submitted to the UNCC for approval
- Progression via the UNCC will ensure that oversight remains in place of any PAC, PARR related, request

Solution

- Currently, UNC Section V16.12 references *‘Any amendment to the Performance Assurance Report Registers shall be made in accordance with the Modification Rules and for such purposes the Performance Assurance Report Registers shall be deemed to be a part of the Code’*
- It is proposed that this is amended to allow the PARR to become a UNC related document that can be amended through a request by the PAC, that is subsequently determined by the UNCC

Recommended Steps

- The Proposer recommends that this modification should be:
 - Not subject to self-governance because it could impact competition between Shippers and Suppliers and will therefore require Authority Direction
 - Workgroup assessment to develop the modification for 3 months
