2A.1 Percentage of Estimated Reads for PC1 & PC2

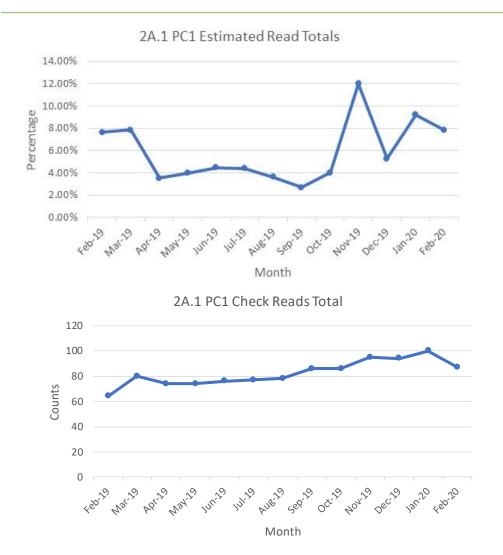

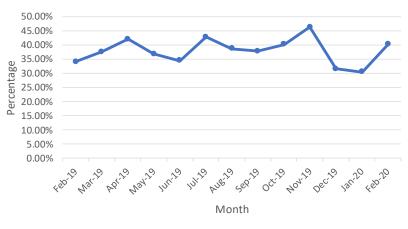

Observations:

- PC2 Estimated Read Performance has reversed on its negative trend in February with estimated reads increased by c. 10% m/m
 - This has been driven by several Shippers who exhibited _ poor read performance
- The number of check reads for PC2 has significantly increased since May 2019 – working with CAMs to resolve issues with Shippers

2A.1 Estimated & Check Reads - Product Classes 1 & 2

2A.2 – No Meter Recorded

Report measures the percentage of each shippers portfolio where no meter recorded in the supply point register

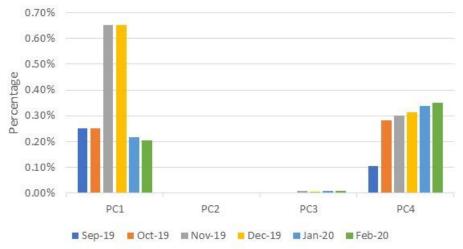

PC3

Highest shippers: Roseau 0.14% Praia 0.61% PC2 0% for product class

PC4

Highest shippers: Oranjestad 2.22% Pyongyang 2.67% Marigot 9.09%

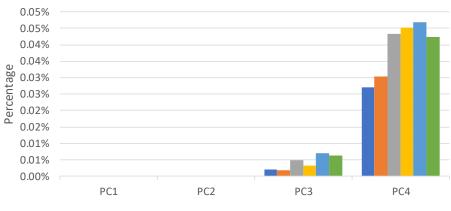

Observations:

- Increased in the number of no meters recorded on the supply point register has increased significantly within PC4 since September 2019.
- The increase in PC1 is primarily due to changes in the total number of supply points in the product class and not driven by the change in total number of no meters recorded

2A.3 No Meter Recorded and data flows received

Observations:

- Transfer read performance remains low and is significantly below the UNC obligation
- Average transfer read performance over the last 12 months is 36.30%

Recommendations:

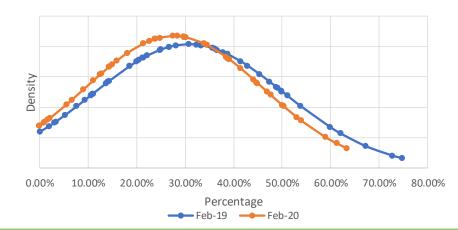

- Industry education on obligation to provide opening meter readings following confirmation.
- Industry engagement on the difficulties providing opening meter reading following confirmation.

1	2A - Estimated & Check Reads used for Gas Allocation, andconsumption adjustments for Product Classes 1 & 2	Need to count everyday portfolio and count mprn where read has been estimated and no actual present on the same day . Check Read : For check reads we would need to check , as of reporting day how many class 1 & 2 MPRNs are present with DRE/AMR. For those MPRNs we have site visit read <=14 months and no subsequent site visit read . Those are outstanding ones per shipper.	Class	Annual	Percentage	September	M-2
2	2A - No Meter Recorded in the Supply Point Register	AQ Band wise , AQ band based on report run day . Class wise different table And AQ Band. Exclude NTS connected Sites & Telemeterd. Exiting SHPK - Topic - Confirmed No Asset Report	Class	Annual	Count & B - Percentage	Νον	M
3	No Meter Recorded in the Supply Point Register and data flows received by Xoserve	Same as above but additionally need to check if for above MPRNs any Data Flow Means - > Asset Update , C & D Store & Reads received in that month	Class	Annual	Count & B - Percentag		
4	2A - Shipper Transfer Read Performance	M-2 is considered – Open OPNT_REQ_FOLL_CON OPNT_RECEIVED_10	Class	Annual	Percentage	September	M-2
5	Read Performance	As per frequency we need to check if we hav e received the read e.g. month read site will check if we have received the read in month .Class and shipper transfer are excluded .6 Monthly read site need to consider yearly ,It is not in UNC. It will be like MUR logic M-2 , exclude sites where class changes happened in M-2 , shipper changes			Percentage	September	M-2
