

Gemini System Enhancements – Summary

- The scope of the Gemini System Enhancements (GSE) project includes a number of items that will improve the Gemini application
- Items are categorised under the themes of APIs, Balancing & Capacity, System Performance and Security/User Access
- The external Gemini user community are invited to participate in workshops to add further detail to the requirements:
 - **Virtual workshops will be held on various dates between 9 July – 23 July 2020**
 - Workshops will cover a specific theme, for example APIs
