

February 2024 UKLink Major Release

Update to PAC on Consequential Changes to PARR Suite of Reports March 2024 PAC

Objectives

- Summarise the changes in the February 2024 Major Release which impact the PARR suite
- Highlight when the new/updated reports will be visible to PAFA and PAC
- Introduce the proposed updates to the PARR Document
 - Version moves to 5.3
 - (Briefly) review change marked version and request PAC to vote upon it

February 2024 Major Release

- XRN 5682 February 2024 Major Release has 3 components
 - XRN 5605 Amendments to the Must Read process (IGT159V)
 - XRN 5604 Shipper Agreed Read (SAR) exceptions process (Modification 0811S)
 - XRN 5607 Update to the AQ correction processes (Modification 0816S)
- Link to the Feb 24 E-Learning material:
 <u>February 2024 Change Release Overview | Rise 360 (articulate.com)</u>
- All the changes have an impact on PARR suite
- This presentation summarises the changes and the next steps

XRN 5605

XRN 5607

UNC Mod	0816S	
Description	Update to the AQ correction processes	
PARR Impact	Additional Reason Codes on the existing PARR report (No change required to PARR Definition)	
First Usage of new Codes	From 25 Feb, first new corrections considered in March, go live of first new AQs 1 st April	
First Reporting	April's new AQs due to corrections reported to PAFA in May	
First Delivery to PAFA	16 th May	
First Presented at PAC	June 2024 meeting	
Shipper Reporting	Existing Dashboard in DDP – extra Reason Codes will appear in April	

Next steps

- We have updated the PARR document (PAFD Appendix) with the report layouts as previously approved at PAC
- We proposed to make one update for both changes, in time for April 2024 (rather than two separate changes)
- PAC has authority to update the PARR under UNC Mod 0674 rules – no UNCC approval required
- PAC will be asked to vote upon the changes at the March meeting – first Known Meter Issue reports will be published for April meeting

Further Update to Existing Report

- Existing "AQ Overdue for a Meter Reading" reports - 2A.13 and 2B.16
- Current reports treat all sites with Smart meters as requiring monthly reads
- This was inconsistent with UNC rules which only require DCC Active Smart meters and AMR sites to be monthly read
- We have now amended the AQ Overdue report to align with the UNC rules on monthly reading requirement
- This will move c. 2m sites out of the category and reduce overall AQ at Risk
- The first revised report will be delivered to PAFA in March and presented to PAC in April 2024
- No update required to the PARR Definition as it already uses the "operational Smart meter" terminology

Using Current Reporting Criteria

Category	Overdue AQ GWh	Overdue %
Class 1	1,096	1.97%
Class 2	100	1.14%
Class 3	971	1.28%
Class 4 - AQ GT 293000	13,912	22.29%
Class 4 - Smart - Monthly	14,275	12.15%
Class 4 - Annual	9,910	7.66%
Total	40,264	8.96%

Using Revised Reporting Criteria

Category	Overdue AQ GWh	Overdue %
Class 1	1,096	1.97%
Class 2	100	1.14%
Class 3	971	1.28%
Class 4 - AQ GT 293000	13,912	22.29%
Class 4 - Smart - Monthly	6,272	7.10%
Class 4 - Annual	11,699	7.38%
Total	34,050	7.58%
