04 July 2007

Dear Julian,

Modification Proposal: 0153: Amendment of Interconnector UK's Network Entry Provisions.

Thank you for the opportunity to comment on the above UNC Modification Proposal.

SGN fully supports the above Modification Proposal.

SGN believes implementation of this proposal should help benefit security of supply by helping to maximise gas supplies and in doing so we would envisage that this should help reduce market uncertainty and price volatility, helping reduce risk of further increases in gas prices. This in turn should help secure effective competition. Furthermore, improved stability and reliability in gas supplies should help Transporters in the economic and efficient planning and operation of the pipeline system.

We hope you find these comments helpful.

Yours sincerely

Bali Dohel
