

To: UNC Parties, including Shippers and Large Gas Transporters

18 August 2015

Dear Colleague

The data and calculations associated with the final AUG Table for 2015/16 have been made available.

There are two sets of data available:

- a **series of CSV files** containing data associated with the consumption calculation process
- a series of **Excel spreadsheets** that are used to calculate different components of unidentified gas and bring the results altogether to form the AUG table

The CSV files consist of common data associated with the consumption methodology and separate exports of meter reads and volumes for each LDZ. The CSV exports cannot be uploaded to the UK-Link Documentation secure website due to their size, but are available from Xoserve on DVD to those parties that request them. The data sets contain dummy MPRs for anonymity and there are no references to Shippers within the data.

If you wish to request the CSV data, please contact Xoserve by email at the box account: as.billing.commercial@xoserve.com, and provide your registered company name, 3-letter UNC Shipper Shortcode and the name and address to which the data DVDs should be posted, plus your contact details in the event of any queries.

Please note that this data is provided only for the purposes of your review of the final AUG Table and must not be used for any other purpose. Nor should it be disclosed to any other party (that includes consultancies that you may wish to employ to carry out investigations) without express permission from Xoserve.

The Excel spreadsheets include the calculations of the directly estimated components of unidentified gas and relevant input data covering iGT CSEPS, consumer and large meter errors, Shipperless/Unregistered sites, detected theft and summaries of the consumption calculations. The results of all these processes are brought together to produce the AUG Table.

The Excel spreadsheets have been posted separately on Xoserve's new secure Sharepoint site under the section "22. MOD229 AUG E Data Provision \ 21. Final

AUGS Supporting Information” with detailed guidance notes to explain how these spreadsheets work. If you are employed by a UNC signatory and do not already have access to this site, or are having difficulties using your login credentials, please contact extranetadmin@xoserve.com

If you have any queries regarding this communication please contact me at the address below.

On a related note, I would like to draw your attention to the decision made at December 2014 UNCC not to undertake any work on a Statement or Table for 2016/17. A brief summary of the reasons for this decision has been published in this section of Joint Office website, under Statement 5: <http://www.gasgovernance.co.uk/auge/state5> . As a result there will be no AUG work in the coming year, and DNV GL is not able to respond directly to any new queries.

Yours sincerely

Fiona Cottam
