PAC Reporting Requirements

Schedule 1 reports

4 reports:

- 1. Standard Correction Factors for sites with AQ > 732, MWH
 - 2. No Meter Recorded in the Supply Point Register
 - 3. Shipper Transfer Read Performance
 - 4. No Reads received for 2, 3 or 4 years (includes estimated transfer readings)
-
- Schedule 1 reports were offered as the data requested aligns to that already provided within the monthly Shipper Performance Packs.
 - Xoserve offered to provide on a best endeavors basis, with the intention that it had no detrimental impact on the Nexus programme.

Issue:

- Reports 1, 2 and 4 refer to EUC Bands. Currently these reports are filtered on AQ and do not look to report on the EUC bands.
- This change is not possible – It will take time and move resource away from Nexus.
- It is proposed to provide the data as is presented within the Shipper performance packs however within a consolidated list, therefore based on AQ and not EUC band.

Schedule 1 delivery

- The delivery of re-coding these reports to produce a consolidated view is estimated to be mid –December.
- Should Users require this information before this date there is an option to ask the industry to share their performance pack data.
- To be agreed:
 - Method of delivery or publication with the Industry view
 - How to deliver to PAC members
 - Responsibility

Schedule 2

- Range of questions - examples:
 - Report regarding no meter present and date flows being sent – are these data flows with regards to reads? Asset updates?
 - How to deal with Class change in the month?
 - How to deal with fault flags?
 - Within read performance are reads being counted once per MPRN or all reads for that MPRN?
 - How to deal with change of Shipper?
 - How to deal with MRF change?

PAC view of best way to resolve

- Questions through UKLC?
- Workshop hosted at Xoserve?
- Mod proposer to respond?
