

ACTION SF0602 - Northern Gas Networks

Response provided by email 27 September 2016

Dear Colleagues,

With reference to the action point below

SF0602 GDNs to confirm what commercial arrangements are in place for the shipping of bio methane gas.

a) Each GDN to confirm where it has NEAs in place in relation to bio methane entry and the location of bio methane sites.

b) Each GDN to confirm how CV variances are addressed (i.e. how CV is ensured to be consistent with the rest of the network and what approvals are in place - CV and Wobbe ranges, etc.) and what obligations the GDNs have to support/control low CV gas entering the system(s).

Could you please publish the following comment on the website on behalf of Northern Gas Networks.

For the action SF0602 – GDN's to confirm what commercial arrangements are in place for the shipping of Bio Methane gas please see below for the link to the Northern Gas Website where all the details can be found.
