***This consultation is aimed at establishing if the content/effect of the variation have caused you to change a view that you previously expressed, or to take a view that you had not previously considered. Please note any representation received in respect of Modification 0528 will be carried forward should parties not wish to change their original representation.***

**Reason for support/opposition: Please summarise (in one paragraph) the key reason(s)**

Further to industry developments of Modification 528V, we believe the progress made in the development of the business rules is sufficient to meet the needs of both Transporters and Shippers. We support the implementation of arrangements as proposed by the modification, which is required to enable an orderly and efficient transition from the current UNC arrangements to the Project Nexus arrangements being introduced by UNC Mod432.

**Self-Governance Statement: Please provide your views on the self-governance statement.**

We concur that the modification is likely to have a material effect on competition and that self-governance is not appropriate.

**Implementation: What lead-time do you wish to see prior to implementation and why?**

We concur with the implementation timescales as detailed within the modification report.

**Impacts and Costs: What analysis, development and ongoing costs would you face?**
