

EU CAM Amendment & Incremental Update

6 Oct 2016

Expected Timeline

- 2nd Comitology Meeting 29/30th September 2016
 - Text is still subject to change during this phase - most changes will be “clarifications” but....content changes by EC still possible
 - Still intended as a voting meeting even if changes made during meeting
 - Allows for completion prior to October Madrid Forum
 - 1st April 2017 Entry into Force.
- As discussed last month, NGG plan two UNC Modifications:
 - Non-Incremental Changes - for implementation 1st April 17.
 - Incremental Changes - for implementation 1st July 17.
 - Plan to submit mods to Oct panel and release before Oct 6th WG.

Pre Comitology changes

CAM Art 6 – Capacity calculation & maximisation

- The calculation methodology and the rules of making available the capacity, adopted by the transmission system operators, shall guarantee that when ~~a crisis level as defined in Article 10 of Regulation (EC) No 994/2010 is declared~~ an emergency situation or when an exceptional event as defined in Article 2(a) of Commission Regulation (EU) No 2015/703 occurs in the Member State or an adjacent Member State firm capacity at interconnection points has priority over firm capacity at exit points into storage facilities.

CAM Art 21 – Capacity Conversion

- Within six months following the written request of a network user holding unbundled capacity at one side of an interconnection point, transmission system operators shall offer a free of charge capacity conversion service for annual, quarterly or monthly capacity product at that interconnection point, if no sufficient matching unbundled capacity on the other side of the interconnection point is offered. This service shall be offered on a non-discriminatory basis and shall prevent an undue overpayment of booked capacity. The implementation may be facilitated by the capacity booking platform(s) referred to in Article 37. The use of this service shall be reported annually to the respective national regulatory authorities.

CAM Art 32 – Interruptible Capacity

- Transmission system operators may only offer standard capacity products for interruptible capacity of a duration longer than one day if the **respective** corresponding monthly, quarterly or yearly standard capacity product for firm capacity was sold at an auction premium, **was** sold out, or was not **available** offered.
- Transmission system operators shall only offer a daily capacity product for interruptible capacity in both directions at interconnection points where the respective standard capacity product for firm capacity ~~has been offered but~~ was sold out day-ahead **or was not offered**. At unidirectional interconnection points where **technical** firm capacity is offered only in one direction, transmission system operators shall offer **at least** a daily product for interruptible capacity in the other direction.
