

## Modification Proposal 0373

### Full Connection Offer

#### 1. The Conceptual Design Study Report

1.1 The Conceptual Design Study Report shall include (but not be limited to) the following:-

- (a) a statement of the degree of suitability of the proposed location of the National Grid Facilities: provided that this assessment of suitability shall not include considerations of pipe laying feasibility between the proposed National Grid Facilities and the Gas Plant;
- (b) confirmation that the Conceptual Design Study Works have been carried out in accordance with the stated requirements as set out in xxxxx;
- (c) a statement of the plot size required for the National Grid Compound as defined in xxxx;
- (d) preliminary engineering line diagrams;
- (e) a statement as to whether it will be possible to achieve a Date for Substantial Completion to allow the Company to meet its preferred first gas date for the Gas Plant of xxxxxxxx: provided that the Company's preferred first gas date for the Gas Plant shall not be binding on National Grid in any way and shall have no effect for the purposes of the Agreement;
- (f) the Date for Substantial Completion and a proposed programme of main events for the Design and Build Works, indicating any interaction likely to be required with the activities of any of the Company's contractors;
- (g) the Design and Build Works Estimate, which will be on the basis that the Company will provide all necessary permanent and temporary land and facilities as set out in xxxxx and will obtain all necessary construction permits;
- (h) details of the Company Provided Facilities (including but not limited to any temporary and permanent land) and the construction permits that would be required by National Grid in connection with the construction of the proposed National Grid Facilities;
- (i) a specification for the facilities to be provided by the Company for the conveyance of Signals;
- (j) a drawing (the "**National Grid Drawing**") of the proposed National Grid Facilities; and
- (k) Offtake / pressure information, design parameters / temperatures, cost estimate, pipe sizing calculations,
- (l) any other details (not set out above) as may be required by the Agreement to be included in the Conceptual Design Study Report.

- 1.2 Where there is more than one option for the location and/or specification of the proposed National Grid Facilities and/or for carrying out the Design and Build Works, the Conceptual Design Study Report shall clearly state this fact and shall specify the details set out in paragraph 1.1 for each such option.
