

GTCR – Next steps following confirmation of Ofgem Policy

NTSCMF: November 2015

GTCR update

- 13th November 2015
 - Ofgem published their conformation of policy view and next steps
- Areas identified to review
 - the technical and economic feasibility of a dual regime; and
 - the practical aspects of moving to a regime with floating capacity charges at all entry points, taking into account the currently unclear aspects of the TAR NC.
 - Review of discounts on Entry capacity to be less than current levels

GTCR update

- In advance of producing analysis and work related to these subjects we would like to understand from industry where possible:
 - Are there any issues that you feel need to be considered that can be provided in advance of this work?
 - Are there any impacts you are aware of that would be relevant to these areas?
- It would be beneficial to receive any inputs ahead of the next NTSCMF. Please send relevant inputs to:
