

19th August 2008

Update To The Incremental Entry Capacity Release Model

Dear Colleague,

Further to the QSEC Auction invitation sent on 18th August 2008, please be aware that an updated version of the IECR Charging Model has been posted on the National Grid website today, 19th August, at:

<http://www.nationalgrid.com/uk/Gas/Charges/statements/transportation/iecr/www.nationalgrid.com/uk/Gas/Charges/statements/>.

This update corrects the "Restricted Incremental Capacity" to reflect the variation from the default lead time at certain ASEPs. Also the price base assumption has been corrected.

Users of version 3.8.6 are advised to download the updated version 3.8.7 of the model from:

<http://www.nationalgrid.com/uk/Gas/Charges/statements/transportation/iecr/www.nationalgrid.com/uk/Gas/Charges/statements/>.

National Grid apologises for any inconvenience this may cause.

If you have any queries with regards to the IECR Charging Model please contact Mark Amos on 01926 654878. If you have any queries with regards to entry capacity, the auction mechanism, Gemini or information provisions then please do not hesitate to contact me on 01926 655342, Chris Gumbley on 01926 654071 or Dave Wagstaff on 01926 654045.

Yours sincerely

Kay Haycock
