Dear Paul,

Indicative Notice of Intention to Produce the Annual Yearly and Annual Quarterly Interconnection Point (IP) Reserve Prices.

Under the change introduced in Capacity Allocation Mechanism (CAM) effective from 1 November 2015, the Interconnection Points (IPs) have different auctions and auction timings. The next Annual Yearly and Annual Quarterly Auctions at the IPs will be held next year for capacity from 01 October 2017.

Therefore, I am writing to give indicative notice of our intention to produce for both Entry and Exit Annual Yearly IP reserve prices for the Annual Yearly IP auction which is to be held in March 2017¹ and the Annual Quarterly IP reserve prices for the Annual Quarterly IP auction which is to be held in June 2017.

Reserve prices for the Annual Yearly and Annual Quarterly auctions are calculated in accordance with the arrangements set out in Section Y of the Uniform Network Code (UNC) – Charging Methodologies², Section B of the European Interconnection Document (EID) – Capacity³ and the Entry Capacity Release (ECR) Methodology Statement.

Entry reserve prices at IPs and final Exit reserve prices at IPs are set using a transportation model which will include:

- Supply and demand patterns determined from the latest data in the 2016 Ten Year Statement and the balancing rules in accordance with Section Y of the UNC.
- The pipeline network expected in 2017/18 which is based on expected pipeline changes included in the 2016 Ten Year Statement.
- Latest expansion constant will be included for the investment costs.

The notice of the reserve prices to apply at both the Entry Annual Yearly IP auction and Entry Annual Quarterly IP auction will be given at least two months in advance of the March 2017⁴ Entry Annual Yearly IP auction.
