¹ We also need to include legal text which enact the publishing business rules from the modification. Views welcome as to whether this should be included under paragraph 1.14 or individually under the entry capacity (UNC TPD ref B2) and exit capacity sections (UNC TPD ref B3).

² We could also include legal text which enact the publishing business rules from the modification into UNC and a guide on the website, alternatively this aspect could be produced solely as a guide on the website? Views welcome on this point.

~~(k) — Nothing in this paragraph 2.2.18 shall be construed as giving rise to a requirement that National Grid NTS make available NTS Entry Capacity in relation to the New Aggregate System Entry Point on secondary annual invitation dates or that National Grid NTS invite Users to submit secondary applications.~~

Replace with the following:

2.2.18 Not used.

Add a new paragraph 2.6.8 as follows:

2.6.8

(a) Where the User or Nominated User(s) is holding an amount of NTS Entry Capacity and that Capacity became Registered under the terms of the PARCA pursuant to paragraph 1.14, the User or Nominated User(s) will be allocated an amount of Capacity equal to the amount reserved under the PARCA on the date as specified in the PARCA; and [needs clarifying how this works and what it is trying to do. What is holding, registered, and what does the date specified refers to. Should say the registered amount must be the amount reserved in the PARCA, and will be turned into allocated capacity?]

(b) the User or Nominated User(s) agrees to pay by way of NTS Entry Capacity Charges for the Quarterly NTS Entry Capacity allocated in accordance with paragraph 2.6.8(a) the step price or the reserve price (as the case may be) corresponding to the [relevant step price group for the calendar quarter]. Is this necessary? Wouldn't it automatically follow that you get charged as with any other allocated capacity at the clearing price? Or do you need a reference to define the applicable price?

Amend paragraph 2.8.4 as follows:

2.8.4 Where pursuant to the terms of a Capacity Management Agreement a User surrenders Firm NTS Entry Capacity at an Aggregate System Entry Point in relation to a Day, the amount of the User's Available Firm NTS Entry Capacity (which excludes Reserved Entry Capacity reserved under a PARCA pursuant to paragraph 1.14) at the Aggregate System Entry Point shall be reduced by the amount surrendered by the User pursuant to the terms of the Capacity Management Agreement.

Amend paragraph 2.11.1 as follows:

2.11.1 (a) A User shall, ~~subject to paragraph (b) below,~~ pay Capacity Charges ("NTS Entry Capacity Charges") in respect of its Registered NTS Entry Capacity at Aggregate System Entry Points. Delivers what 2.6.8 does?

~~(b) — Where:~~

~~(i) — pursuant to paragraph 2.2.18 National Grid NTS allocates Quarterly NTS Entry Capacity for the first time at a New Aggregate System Entry Point from a specific date (the "First Capacity Allocation Date") but fails to accept gas properly tendered for delivery by a User (for the purpose of this paragraph 2.11.1 a "relevant User") at that Aggregate System Entry Point in the period on and following that First Capacity Allocation Date; and~~

~~(ii) — the reason for such failure is the non-commissioning of that Aggregate System Entry Point or any System Entry Point comprised within it; and~~

~~(iii) — the relevant User both holds Registered Quarterly NTS Entry Capacity and does properly tender gas for delivery on the relevant Day(s) at that Aggregate System Entry Point then no NTS Entry Capacity Charges shall be payable by that relevant User in respect of such Registered NTS Entry Capacity at that Aggregate System Entry Point for each Day in the period from the First Capacity Allocation Date to the Day immediately preceding that on which National Grid NTS is first able to accept gas properly tendered for delivery by any User. Notwithstanding any other provision of the Code, the provisions of this paragraph (b) shall be the sole and exclusive remedy of Users where National Grid NTS fails to accept gas properly tendered for delivery in the circumstances set out above.~~

~~(e)~~ (b) A User shall pay Commodity Charges ("NTS Entry Commodity Charges") in respect of the flow of gas into the NTS on any day, or a charge calculated by reference to Special Condition 2A and 3A of National Grid NTS's Transporter's Licence.

Amend paragraph 2.11.2 as follows:

2.11.2 The NTS Entry Capacity Charge payable by a User in respect of each Day will be determined for each Aggregate System Entry Point and each class (as described in paragraph 2.1.4) of NTS Entry Capacity, as the amount of the User's Registered NTS Entry Capacity (of the relevant class, and in the case of Quarterly NTS Entry Capacity and Monthly NTS Entry Capacity, applied for pursuant to paragraphs 2.2 and/or 2.3 and/or reserved under paragraph 1.14, and allocated following an invitation date and/or allocated under a PARCA pursuant to paragraph 1.14) multiplied by the Applicable Daily Rate.

Amend paragraph 2.11.3(a) as follows:

2.11.3 The Applicable Daily Rate shall be:

(a) in respect of Quarterly NTS Entry Capacity;

(i) applied for pursuant to an annual invitation under paragraph 2.2, the applicable reserve or cleared price (for the calendar quarter) as determined following the relevant annual invitation date in accordance with paragraph 2.6; and

(ii) applied for, reserved and held-registered/allocated under a PARCA pursuant to paragraph 1.14 [the applicable price as set out in the relevant Transportation Statement].

Amend paragraph 2.12.3 (a) as follows:

2.12.3 The System Entry Overrun Charge shall be calculated as the amount of the overrun quantity multiplied by whichever is the greatest of:

(a) $(8 * A)$, where 'A' is the highest price bid price in relation to a capacity bid in respect of which NTS Entry Capacity was allocated following an invitation under paragraphs 2.2, 2.3 and 2.4 and/or the highest price payable in respect of NTS Entry Capacity allocated under a PARCA pursuant to paragraph 1.14; and

Amend paragraph 2.13.3 as follows:

2.13.3 In relation to each Aggregate System Entry Point and a calendar month, National Grid NTS shall pay to each relevant User an amount ("Capacity Revenue Neutrality Charge") determined as:

$$\text{RCR} * \text{UFAC} / \text{AFAC}$$

where:

RCR is the Relevant Capacity Revenues;

UAFC is the aggregate sum of the User's Fully Adjusted Firm Available NTS Entry Capacity (exclusive of any Reserved Entry Capacity under a PARCA pursuant to paragraph 1.14) at each Aggregate System Entry Point; and

AFAC is the aggregate sum of all User's Fully Adjusted Firm Available NTS Entry Capacity (exclusive of any Reserved Entry Capacity under a PARCA pursuant to paragraph 1.14) at each Aggregate System Entry Point

in each case as determined at 04:00 hours on the relevant Day.

Amend paragraph 2.17.9 as follows:

2.17.9 Where pursuant to paragraph 2.17.8 a Force Majeure Option Quantity is deemed to have been surrendered at the affected ASEP in relation to a Day, the amount of the Force Majeure Entry User's Available Firm NTS Entry Capacity (exclusive of any Reserved Entry Capacity under a PARCA pursuant to paragraph 1.14) at the affected ASEP shall be reduced by such Force Majeure Option Quantity.

3. NTS Exit Capacity

Amend paragraph 3.1.3 as follows:

3.1.3 Users may:

- (a) apply for and be registered as holding NTS Exit Capacity as:
 - (i) Annual NTS Exit (Flat) Capacity pursuant to an application in accordance with paragraphs 3.2 and 3.4;
 - (ii) Daily NTS Exit (Flat) Capacity pursuant to an invitation in accordance with paragraphs 3.5 and 3.6;
 - (iii) NTS Exit (Flexibility) Capacity in accordance with paragraph 3.7;
- ~~(b)~~ [\(b\) apply for, reserve and be registered as holding Enduring Annual NTS Exit \(Flat\) Capacity under a PARCA pursuant with paragraph 1.14](#)
- ~~(c)~~ [\(c\) offer or agree to surrender NTS Exit Capacity in accordance with paragraph 3.11.](#)

3 Phase 2 - No works/investment required

3.1 Where National Grid NTS has identified in the Phase 1 PARCA Works Report that no works and/or investment is required for Phase 2, in order to reserve capacity the PARCA Applicant is required to put in place acceptable security to comply with TPD Section V in an amount not less than the Reservation Amount.

⁴ The name of the Statement may need to be amended post update for PARCA so it covers connections and the application and reservation fees as applicable for PARCAs.

3.2 The Reservation Amount will be calculated as ten per cent (10%) of the indicative value associated to the requested Capacity for NTS Exit Capacity and/or NTS Entry Capacity and detailed in the Phase 1 PARCA Works Report.

3.3 The Reservation Amount for NTS Exit Capacity will be calculated as follows:

The Reservation Amount for NTS Exit Capacity will be:

$$\text{Reservation Amount (£)} = [0.1] \times ((\text{PARCAEx}_{\text{ind}} / 100) \times (\text{Qex} \times ((365^{\pm} \times 4) + 1)))$$

Where:

PARCAEx_{ind} = the indicative NTS Exit Capacity price (p/kWh/Day) for the relevant Enduring Annual NTS Exit (Flat) Capacity at the NTS Exit Point included in the Phase 1 PARCA Works Report. (Note: This price may differ from the actual price determined at a later date and used to calculate actual transportation charges)

Qex = the maximum amount of Enduring Annual NTS Exit (Flat) Capacity to be Reserved by the PARCA Applicant (kWh/Day) as specified in the Phase 1 PARCA Works Report.

3.4 The Reservation Amount for NTS Entry Capacity will be calculated as follows:

$$\text{Reservation Amount (£)} = [0.1] \times [(\text{PARCAEn}_{\text{ind1}} / 100 \times \text{Q}_{\text{en1}}) + (\text{PARCAEn}_{\text{ind2}} / 100 \times \text{Q}_{\text{en2}}) + (\text{PARCAEn}_{\text{ind3}} / 100 \times \text{Q}_{\text{en3}}) + (\text{PARCAEn}_{\text{ind4}} / 100 \times \text{Q}_{\text{en4}}) \dots + (\text{PARCAEn}_{\text{indn}} / 100 \times \text{Q}_{\text{enn}})]$$

Where:

PARCAEn_{ind} = the indicative clearing price for each individual quarter for the Quarterly NTS Entry Capacity requested for Quarters 1 to n where n is the last quarter of capacity requested and confirmed by the PARCA Applicant.

Note: Where an NPV test is required and passed, the indicative clearing price will be that specified for each Quarter by the PARCA Applicant in accordance with the NPV test. Where no NPV test is required the indicative clearing price applied will be the P0 price.

Q_{en} = Quarterly NTS Entry Capacity requested via the PARCA for each quarter for the first quarter up to and including the last quarter, n, for which capacity is requested.

3.5 Should the PARCA be terminated by the PARCA Applicant prior to the allocation date as specified under the PARCA, the termination amount will be the Reservation Amount. The termination amount will be invoiced to the PARCA Applicant and the security provided under the PARCA may called upon by National Grid NTS in the event of non-payment by the PARCA Applicant.

4. Phase 2 - Works/investment required

4.1 Where National Grid NTS has identified in the Phase 1 PARCA Works Report that additional work and/or investment is required for Phase 2 the PARCA Applicant will be required to put in place security to cover the estimated costs of the works in accordance with the PARCA through providing an acceptable form of security in accordance with UNC Section V.

4.2 Should the PARCA be terminated by the PARCA Applicant prior to the allocation date as specified under the PARCA, the termination amount will be the actual costs for the planning activities incurred by National Grid NTS up to date of termination. The termination amount will be invoiced to the PARCA Applicant and security provided under the PARCA may called upon by National Grid NTS in the event of non-payment by the PARCA Applicant.
