Steve Mulinganie	(SM)	Gazprom

*via teleconference

Copies of all papers are available at: <http://www.gasgovernance.co.uk/0427>

1. Introduction and Status Review

1.1. Minutes from the previous meeting(s)

The minutes of the previous meeting were accepted.

1.2. Review of actions from previous meeting(s)

No outstanding actions to consider.

2. Workgroup Report

BF opened by explaining that seeing as the Workgroup approved the content of the Workgroup Report at a previous meeting, this is simply an opportunity to provide additional comments should anyone have them.

In quickly reviewing the ecotricity representation, parties considered the potential difference between the electricity and gas markets before concluding that the aligning of the timeline synchronisation of these two markets would be considered as part of the SMART Metering

rollout. AM indicated that British Gas agrees with the sentiments expressed in paragraph 3 of the representation.

When asked, consensus was that the Workgroup Report should be amended to note that the Workgroup had considered the meter reading regime differences between electricity and gas but were not of the opinion this modification would have a detrimental impact.

3. Any Other Business

None.

4. Diary Planning

No further meetings planned.
