

UNC Modification 0472 – Restricting the number of registration attempts by a Shipper

Objection Statistics

xserve

respect > commitment > teamwork

Distribution Workgroup 7th May 2014 Actions:

Ref. 0501 - *Xoserve to consider if the objection statistics can be broken down further between domestic and I&C customers.*

Ref. 0502 - *Xoserve to confirm if any objections were processed for the 1.62 million successful confirmations**

The following slides are based on objection data taken from the last four months (January to April 2014), and also includes data from October 2013 as a comparison.

Within the January to April period there were –

78,462 objections raised against 66,923 Smaller Supply Points.

8,022 objections raised against 5,613 Larger Supply Points.

For the purposes of these slides, the term 'cycle' refers to a repeated pattern in which an attempted confirmation is followed by an objection.

e.g. A repeated pattern of 5 attempted confirmations and objections would comprise one cycle.

* 1.62 million successful confirmations were quoted in reference to the previous dataset discussed at Distribution Workgroup on 7th May. The workgroup has since requested an updated snapshot, and therefore this action is addressed in relation to the updated snapshot.

Objections Received

Month	SSP			LSP			Total		
	Objections	MPRNs	MPRNs w/Objections Overcome	Objections	MPRNs	MPRNs w/Objections Overcome	Objections	MPRNs	MPRNs w/Objections Overcome
January	20,495	17,161	509	2,115	1,416	90	22,610	18,577	599
February	19,773	16,928	460	1,887	1,368	106	21,660	18,296	566
March	19,847	17,195	914	1,971	1,421	108	21,818	18,616	1,022
April	18,347	15,639	588	2,049	1,408	158	20,396	17,047	746
Total	78,462	66,923	2471	8,022	5,613	462	86,484	72,536	2,933
Average	19,616	16,731	618	2,006	1,403	116	21,621	18,134	733
October	28,902	23,629	968	2,509	1,733	197	31,411	25,362	1165

The above data demonstrates:

- The number of objections against MPRNs within the given months
- The number of MPRNs against which objections were ultimately overcome.

N.B. Registration attempts are not limited to the same proposing User.
This data has been split between SSP and LSP sites, based on supply point AQ.

Frequency of Objection Cycles

This table demonstrates the occurrence of objection cycles, between the SSP and LSP sites, between January and April 2014.

Number of Objections within Cycle	Occurrences of Cycle within January – April 2014 period (MPRNs)		
	SSP	LSP	Total
5	393	144	537
6	134	53	187
7	59	42	101
8	33	32	65
9	11	27	38
10	0	15	15
11	10	3	13
Total	640	316	956
Average	91	45	137

N.B. Registration attempts are not limited to the same proposing User.
This data has been split between SSP and LSP sites, based on supply point AQ.

Duration of Objection Cycles

The below table demonstrates the range and average duration of each objection cycle.

Numbers of Objections within Cycle	Maximum Duration		Minimum Duration		Average Duration	
	Days	Weeks	Days	Weeks	Days	Weeks
5	116	16	35	5	75.5	10.5
6	118	16	43	6	80.5	11
7	116	16	64	9	90	12.5
8	111	15	75	10	93	12.5
9	117	16	90	12	103.5	14
10	117	16	101	14	109	15
11	113	15	106	15	109.5	15

N.B. Registration attempts are not limited to the same proposing User.
The above figures denote Calendar days
