

**UNC Modification Proposal 0523
'Supply Point Registration –
Facilitation of 'faster switching'
for Shared Supply Meter Points**

**February 2015 UNC
Modification Panel meeting**

Background

- UNC Modification 0477 'Supply Point Registration – Facilitation of Faster Switching' implemented on 7th November 2014
 - Reduced minimum Shipper User transfer timescales to 14 Calendar Days
- Excluded Shared Supply Meter Points (SSMPs)
- Timescales for SSMPs separately identified in UNC (TPD G1.7.10 (c))
- Presently 20 Business Days
- Offline Xoserve 'unique sites' process to be systematised for UK-Link Replacement.

Proposed solution

- Reduction in 'minimum' SSMP Supply Point Confirmation timescale sought to become 14 Calendar Days to align with Modification 0477 arrangements
- Not material change so self governance procedures sought
- Not User Pays so no cost assessment required
