

## Update on Mod 461 Issues

**Mod 461 WG Meeting 5<sup>th</sup> December 2013**

## NTS Exit (Flat) Capacity

---

- UNC TPD B 3.5 – NG NTS proposed to retain the times for all the mandatory allocations, but change the latest time for allocations to be made from D 02:00 to D 01:00
- Mod 461 WG members expressed a preference for the latest time for allocations to be kept at D 02:00 to allow for flexibility
- NG NTS have considered the views expressed and amended the proposal to keep this time at D 02:00

## D-1 12:00 OCM Contract Start Time

---

- Preference from Mod 461 WG to move the D-1 OCM start time to 11:00
- After review, NG NTS are able to accommodate this request in the Mod proposal
- However; NG NTS have not included this change in Mod 461 as this could potentially conflict with Mod 471S
  - Mod 471 has since been raised which seeks to amend the D-1 OCM start time to 08:00
  - The proposed implementation date for Mod 471 is also expected to be much earlier than Mod 461

## Change to Publication Times (UNC Section V)

---

- Annex V-1 Aggregate physical quantity of gas offtaken from the system on the preceding Day at NTS Exit Points published by 12:00 on each Day
  - This is ordinarily published by NG 11:00
- Mod 461 WG expressed a preference for the actual publication time to be codified
- Reviewed with MIPI publication team;
  - Unable to commit to publishing at this time each day
  - Published early to allow for corrections if there are missing data items or data publication issues
